I would like to express my interest in a position with your position.

As **Senior Project Manager and Coordinator** for Highland al Hujaz LTD; as charged with Business Development Management for all projects Afghanistan North and South for US Army Corps of Engineers Projects. During the years of 2010 and 2011, I sought out and placed several joint venture partners for projects in Kabul, North and South Afghanistan allowing the company to become profitable, successful and solvent. Tasked with 26 IDIQ contracts Northern Afghanistan, I placed a joint venture for allowing for additional years of contract production. In charge of sales, contracts, sub contractors, material men, and finance. I solved procurement and logistics schemes, solved badging, visa, and work permit issues, licensing, and tax issues as well.

As **Site Project Manager** for ARKEL INTL in Tarin Kowt Afghanistan I am charged with project management, site business development, and project support and control for 2 large Australian Governmental projects. Key components are sales control volume, site completion management per schedule, new business development.

As site **Superintendent** for WARCOMPINC in Khost Afghanistan, I was charged with supervision of 6 US Expat superintendents, plan review for civil, structural, mechanical, electrical, and architectural over site for the project. I answer directly to the Program Manager for this 20 + million dollar project. Work includes civil site layout, storm water system, sewer system, electrical underground duct bank system, structural concrete buildings and reinforced bunker proof ceilings and walls, on compound self contained sewage processing and treatment facility, grey water reverse system for site irrigation recovery,

As **Chief Facilities Maintenance Manager of the Pacific Architects & Engineers Division** in Kabul, Afghanistan, I have accountability for **directing the execution, construction, implementation, quality assurance of high-profile overseas Department of State or DOD projects and missions**, and providing the maintenance infrastructure and operations to support numerous self-sustaining man camps and facilities. **Directing maintenance and subcontractor teams, project managing the construction and deployment of power, sewage, water, HVAC, garbage, and sewage systems**, and **assuring UFSG, UBC, international electrical, plumbing, and building code compliance** have benchmarked my professional performance in challenging, high-risk construction scenarios.

I am a **technically knowledgeable leader and motivator** experienced with working in challenging multicultural settings and leveraging my technical expertise in the execution of complex construction projects. Offering **20 years of construction industry experience**, I have proven myself to be an analytical troubleshooter and problem solver that excels at **identifying and securing project resources**, and working effectively on all contractor and subcontractor levels. My communication and negotiation skills have allowed me to consistently **bridge multidisciplinary team communications, and drive on-time, on-budget achievement of targeted project objectives**. Those who know me best characterize me as a technically knowledgeable professional with a reputation for **optimizing inventory flow, maximizing labor utilization, and meeting deliverables objectives in high-demand and high-risk job settings**.

At this point, I am seeking a position that will afford continued challenge and opportunity to fully utilize the extensive technical and project management experience I can bring to a progressive company. s

I feel confident that I can bring a rich depth of professional experience to your organization and welcome meeting with you to explore ways in which I can make a meaningful contribution to your project leadership team. My résumé is included for your review and I look forward to hearing from you at your earliest convenience.

Sincerely,

Craig Oxford
